Installing SIM Card and Memory Card

1. Put the thimble tool into the hole near SIM tray, then push until card tray pop up, and then pull out the tray with hand.

2. Put the SIM card into the card slot on the tray, then push the tray into the phone card slot.

Charging the Battery
Change handset in ambient temperature 5°C~35°C;
Internal Battery may leak/overheat and performance may deteriorate outside this range.

Before using the phone, it is recommended to fully charge the battery first.

1. Connect the smaller end of the USB cable to the USB port of the device.

2. Connect the other end of the cable to the USB charger or other USB port with power source (for example, laptop).

3. Plug the AC adapter to a wall outlet to start charging.

* It is recommended that you charge the battery for at least 30 minutes before starting up your device for the first time.

Important Safety Information

Please read before proceeding

- DO NOT place InFocus objects on top of the device, as they may scratch the screen.
- DO NOT drop your device or subject it to severe impacts.
- Bending the body and pushing the display or keys with extreme force could damage the device.
- DO NOT use a pen or any InFocus object to tap the screen.

FCC Regulations:
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Intellectual Property Right Information
Right to all technologies and products that comprise this device are the property of their original owners respectively.

This product has an Android™ platform based on Linux, which can be expanded by a variety of Java-Script-based application SW.

Compliance Information

SAR Information
This device has been tested and meets applicable limits for Radio Frequency (RF) exposure.

Specific Absorption Rate (SAR) refers to the rate at which the body absorbs RF energy. SAR limits are 1.6 Watts per kilogram (over a volume containing a mass of 1 gram of tissue) in countries that follow the United States FCC limit and 2.0 W/kg (averaged over 10 grams of tissue) in countries that follow the Council of the European Union limit. Tests for SAR are conducted using standard operating positions with the device transmitting at its highest power level in all tested frequency bands.

To reduce exposure to RF energy, use a hands-free accessory or other similar option to keep this device away from your head and body. Carry this device at least 15 mm away from your body to ensure exposure levels remain at or below the as-tested levels. Choose the belt clips, holsters, or other similar body-worn accessories which do not contain metallic components to support operation in this manner. Cases with metal parts may change the RF performance of the device, including its compliance with RF exposure guidelines, in a manner that has not been tested or certified, and use such accessories should be avoided.

Safety Precautions for Battery Use
• The phone battery can not be removed, please do not disassemble.

• There is the danger of explosion if disassembly by unauthorized personnel.

• Recycle or dispose used batteries according to the local regulations.

Road and Environmental Safety
• Turn off the phone in areas with a potentially explosive atmosphere or where flammable objects exist such as gas stations, fuel depots, and chemical plants among others. Sparks from these areas could cause explosion or fire and result in injury or even death.

• Do not use hand-held phones while driving a vehicle. Use hands-free devices as an alternative.

Safety in Aircraft
Do not use the phone on board an aircraft. The phone's network signals may cause interference to the navigation system. As a safety measurement, it is prohibited to use mobile phones on board in most countries.

Warranty Statement

Limited warranty

InFocus provides "Product Warranty Statement", at the time of its original purchase, from the InFocus or its authorized distributor, describing the product warranty service. Notes: InFocus does not provide global cross border warranty. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

European Union Regulatory Conformance

The equipment complies with the RF Exposure Requirement 1999/519/EC, Council Recommendation of 12 July 1999 on the limitation of exposure of the general public to electromagnetic fields (0-300 GHz).

This device have been tested to comply with the Sound Pressure Level requirement laid down in the applicable EN 50332-2 standards. Permanent hearing loss may occur if earphones or headphones are used at high volume for prolonged periods of time.

Prevention of Hearing Loss

Warning statement requirement under EN 60950-1:A2.
To prevent hearing damage, do not listen at high volume levels for long periods.

This radio equipment operates with the following frequency bands and maximum radio-frequency power :
GSM850/900 : 35dBm GSM1800 : 32dBm UMTS band 1/5/8 : 25 dBm
LTE band 1/3/5/7/8/20 : 25.7 dBm Bluetooth : <20 dBm
802.11bgn:2.4GHz band <20 dBm NFC 13.56MHz <42dBuA/m at 10mm

Changes or modifications to this product not authorized by the manufacturer could void the EMC compliance and negate your authority to operate the product. This product has demonstrated EMC compliance under conditions that included the use of compliant peripheral devices and shielded cables between system components. It is important that you use compliant peripheral devices and shielded cables between system components to reduce the possibility of causing interference to radios, televisions, and other electronic devices.

We, hereby, declare that this smartphone is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU.

Non-Warranty

No warranty may be asserted or claimed if (1) the product serial number, date code, IMEI, water indicator or the warranty seal has been removed, erased, defaced or altered; or (2) the defect is found to be caused by:

- (1) This device may cause interference;
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.« CAN ICES-3(B)/NMB-3(B)

Compliance Information

This device complies with Industry Canada's licence-exempt RSSs. Operation is subject to the following two conditions:

- (1) This device may not cause interference;
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.« CAN ICES-3(B)/NMB-3(B)

Hearing Aid Compatibility Information (HAC)

Your phone is compliant with the FCC Hearing Aid Compatibility requirements. The FCC has adopted HAC rules for digital wireless phones. These rules require certain phone to be tested and rated under the American National Standard Institute (ANSI) C63.19-2011 hearing aid compatibility standards. The ANSI standard for hearing aid compatibility contains two types of ratings:

- Ratings: Rating for less radio frequency interference to enable acoustic coupling with hearing aids.
- T-Ratings: Rating for inductive coupling with hearing aids in telesil mode.

Not all phones have been rated, a phone is considered hearing aid compatible under FCC rules if it is rated M3 or M4 for acoustic coupling and T3 or T4 for inductive coupling. These ratings are given on a scale from one to four, where four is the most compatible. Your phone meets the M4/T4 level rating.

However, hearing aid compatibility ratings don't guarantee that interference to your hearing aids won't happen. Results will vary, depending on the level of immunity of your hearing device and the degree of your hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

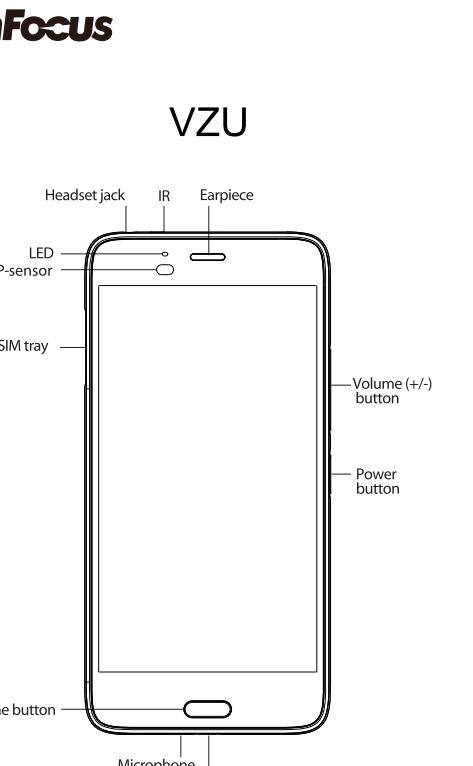

The phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer.

Hearing devices may also be rated. Your hearing device manufacturer or hearing health professional may help you find this rating. For more information about FCC Hearing Aid Compatibility, please go to <http://www.fcc.gov/cgb/dro>.
